

Oleg Savka
Director, Systems & Informatics

Oleg serves as the director of systems & informatics for The Physician Alliance (TPA), one of Michigan's largest physician organizations. In this role, Oleg provides leadership for the continued development of an innovative, agile, and secure information technology solutions. His primary responsibilities encompass a wide variety of strategic technology issues: IT governance and policies management, resource allocation and prioritization, technology standards and best practices promotion.

Prior to joining The Physician Alliance, Oleg served for 17 years as the director of information technology at Emergency Medicine Specialists of TEAMHealth, where he successfully transformed the IT department from traditional client/server shop into a modern SECURE and AGILE technology hub specialized in patient information integration, rapid apps development/deployment and turning health data into health intelligence. Oleg has significant experience working with two major Michigan health systems in collecting and analyzing various sets of patients' data. In 2014 he filed a provisional patent "Health Data Monitor" with USPTO (US 62/058,717).

Oleg has M.S. in information systems from Lawrence Technological University in addition to a B.S. in business administration (equivalent) from Moldova State University and PhD in Economics (equivalent) from Kyiv National University of Trade and Economics. Oleg is a certified information security manager and holds many vendor and industry certifications.
