

## Service Excellence Awards in Care Coordination and Quality Improvement

The Physician Alliance recognizes the importance of collaboration between specialty practices and patient centered medical home primary care practices to improve care coordination and quality improvement in healthcare. TPA developed the **Service Excellence Awards** to encourage specialists to implement and maintain patient centered medical home—neighborhood capabilities that improve patient care. TPA congratulates these specialty practices and is honored to work with practices that demonstrate service excellence in care coordination and quality improvement.

### Service Excellence Award in Care Coordination: 5-star rating
